<sup>3)</sup> Client Access Licenses specify the number of concurrent users connected to GroupChat Server at the same time.

### Hosted Version – Product Upgrades

Fairplay. Any hosted product version may be up- or downgraded to another CAL package size at any time, no additional setup or switching fees apply. Product updates to the latest available version are included in every hosted version package at no additional costs. Support is contained during the whole period of contract.

In case the CAL package (up- or downgrade) should be switched, the current agreement will be extraordinarily terminated and replaced with a new agreement, using the new, chosen CAL package size according to the most recent price list. Any fees paid in advance from the previous agreement will be charged as deposit to the new agreement.

### Setup Version – Product Support, Updates and Upgrades

GroupChat Setup versions contain 1 year product support and product updates. Within this period, the support and update services may be extended for another year; the price is 25% of the current list price on that CAL package. For products with expired update and support contracts: Up to 9 month after the last, terminated support contract, the support and update services may be renewed at 75% of the current list price on that CAL package.

An upgrade to a higher CAL package size is also possible if the previous version is not older than 18 month. A one time upgrade fee of 79 Euro (price without VAT) will apply. The upgrade price is the difference between the old and new CAL package price according to the current price list.

Customizations	Price <sup>2)</sup>
Basic skin color and logo customizations (100 CAL version and up)	238.- Euro (incl. 19% VAT) 200.- Euro netto export
